IN THE CLAIMS:

Please amend Claims 8 and 9 as follows:

8. (Amended) A surface treatment process for treating a surface of a substrate selectively, which comprises successively:

a first step of applying the fluorine-containing epoxy resin composition of claim 1 onto a substrate and drying the applied resin composition;

A₁ a second step of irradiating the applied composition with [an] activation energy [ray] radiation in a pattern through a mask;

a third step of dissolving and removing a part of the applied composition not irradiated with the activation energy

[ray] radiation, by use of a liquid capable of dissolving the uncured composition; and if desired

a fourth step of post-curing the remaining composition.

9. (Amended) A surface treatment process for treating a surface of a substrate selectively, which comprises successively:

a first step of applying the fluorine-containing epoxy resin composition of claim 1 onto a substrate and drying the applied resin composition;

Al
cont. a second step of heating or irradiating with [an] activation energy [ray] radiation the applied composition to effect polymerization and curing over a whole area thereof;

a third step of selectively irradiating the cured composition with [a] breaking activation energy [ray] radiation to partly remove the cured composition; and if desired

a fourth step of post-curing the remaining composition.

REMARKS

Reconsideration and allowance of the above-identified application are respectfully requested.
